

**For immediate release**

## **JWM Engineering Group has been selected as certified repair facility for all Dyn-Optics products**

TRABUCO CANYON, CALIF. --- JWM Engineering Group announces today that it has been selected by Dyn-Optics, of Laguna Hills California, as it's certified repair facility for all of Dyn-Optics products. "JWM Engineering Group and Dyn-Optics have had a long and prosperous relationship for several years" stated Joseph F. Hall Jr, owner of Dyn-Optics. "JWM Engineering Group has been our design, manufacturing, and repair facility for over 3 years now. Many of Dyn-Optics products have been improved and upgraded, along with new product introductions by JWM Engineering during this time."

All of Dyn-Optics customers can now rest assured that a facility exists for them to get their capital equipment repaired in a timely and professional manner, regardless of age of the equipment.

The list of equipment that can be repaired includes the Model 590 Optical Monitors, all Model 262 Reflectometers, Model 5400 Transmissometers and the Model 955 Fire Finder II.
